

## Funtown

### BAND STORY

"

Roni "The Main Man" Collins is Funtown's artistic/musical director, bassist and one of Michigan's most versatile musical celebrity impersonators. A consummate perfectionist (and slightly schizophrenic!), Roni possesses the amazing ability to 'morph' into a different personality faster than you can say "was that REALLY The Artist Formerly Known as Vince"! Whether he's spoofing "Julio Biglazyazz" , "Marvin Gaye" or the female part of "Sonny and Scare", Roni is definitely an entertainer to be admired.

Mark "The Count" Potvin , Funtown's keyboard player, provides the underlying instrumentation (piano/organ/horns/strings or whatever is needed) that has become a hallmark (no pun intended!) of the band's sound. Rarely seen during daylight hours, and NEVER seen without his sunglasses, it has been alleged that his fingers move across the keys at speeds that defy the laws of gravity! Is it just coincidence that Mark and his keyboards are always situated to the rear of the stage in the shadows? Hmmmmm.....

Rick "E(ric) C(lapton)" Allen is arguably one of the most talented lead/rhythm guitar players and male vocalists in the state. His vocal versatility and range is extensive, and he has an almost uncanny ability to emulate (in voice and appearance) any number of well-known recording artists - Buddy Holly, Willie Nelson, and Eric Clapton, just to name a few.

Troy "Troy-Toy" Horton, also known as "Tone Deaf" and "Tom Bones", is Funtown's drummer-extraordinaire! When he's not

spontaneously-combusting the heads of his drums or his drumsticks with the sheer force of his playing, he's transporting the band's sound system and equipment to and from gigs. In his spare time Troy-Toy is our electronic wizard/sound tech and booking agent.
